

Synthetic Patient delivery · mapping correction verified

 **PASS**

Generated: 2026-09-22, 16:34

Result and review

Scope	12 resources in run #2456
Findings	0 errors, 0 warnings, 24 information findings
Next review	Review remaining findings, coverage and the recorded basis before accepting this result for its intended use.

Conformance Summary

 100.0% Overall Score	 12 Resources	 0 Errors	 0 Warnings	 24 Info
--	--	--	--	---

Quality Gate PASS

Issues by Aspect

Aspect	Errors	Warnings
Metadata	0	0
Structural	0	0

Run Details

Run ID	#2456
Server	Synthetic Patient delivery (<redacted>)
Environment	testing
Trigger	api
Started	2026-09-22, 16:34
Completed	2026-09-22, 16:34

Resource Type Breakdown

Resource Type	Count	Errors	Warnings	Info
Patient	12	0	0	24

Issue Completeness

Issue Groups	2
Issue Rows	24
Information Groups	2 groups; 24 rows; 12 affected resources
PDF Appendix	0 groups shown; 2 groups / 24 rows available in JSON/CSV

Full issue appendix available in JSON/CSV exports.

Validation Settings

Source	Run settings snapshot
Note	Derived exclusively from the immutable settings snapshot captured for this validation run.
Enabled Aspects	structural (records/inherit), profile (records/inherit), terminology (records/inherit), reference (records/inherit), invariant (fhirpath/inherit), custom_rule (custom/inherit), metadata (records/inherit), anomaly (records/inherit)
Resource Types	1 selected: Patient
Runtime	strictness standard; best-practice info; delta search on; max concurrent 5; batch size 50

Profile Sources	Simplifier on; Package registry on
Package Policy	version policy prefer-stable; auto-download on; approval required off; 19 approved; 0 pinned
Approved Packages	hl7.fhir.r4.core, hl7.fhir.r4.examples, de.gematik.*, de.medizininformatikinitiative.*, de.medizininformatik-initiative.*, de.einwilligungsmanagement, kbv.*, de.basisprofil.*, rki.demis.*, hl7.eu.*, hl7.fhir.eu.*, hl7.fhir.us.*, +7 more
Terminology Strategy	local-only
Terminology Servers	No enabled terminology server configured
HAPI Wrapper	disabled; configured timeout 30000ms

Reproducibility Contract

Validator	Records Validator v0.6.35
Environment	testing
Validation FHIR Release	R4
Source FHIR Server	Synthetic Patient delivery (http://127.0.0.1:6200/delivery/fhir) R4
Terminology	Local package terminology only
Run Date	2026-09-22, 16:34
IG Packages	None
EHDS FHIR Content Evidence	Not assessed
Content Hash Status	Verified canonical-json-v1
Configuration	Settings: Mode: offline; Validation Strictness: standard; Terminology: local-only; Full structured values in the JSON report; Dispatch Path: records-multi-aspect; Settings Hash: a865c77410811ed9; Schema Version: 5; Execution Policy: standard-v1; Execution Settings Hash: a865c77410811ed9
Thresholds	Anomaly, Overall, Profile, Metadata, Invariant, Reference, Structural, Custom_rule, Terminology: pass ≥ 90%, warn ≥ 75%, max errors 100, max warnings unlimited
Terminology Note	Frozen run snapshot (offline, local-only).
IG Package Note	Frozen active implementation-guide packages from this validation run.
Source Server Note	Frozen source FHIR server metadata from this validation run.
Threshold Note	Frozen quality-gate thresholds from this validation run.
Snapshot Schema	v5
Dataset Scope	api-run-6ea5e5f8-6ba3-418a-be03-c6060919c63a
Records App Version	0.12.0+2a9dc1441
Records App Version Note	Frozen Records application build from this validation run.
Validation Ruleset	2026.09.22.3
Ruleset Hash	sha256:97679d8274f6a238f8899d58245aa4efed0c11629ac74183b0c1e6fcf6c0fb06
Settings Hash	a865c77410811ed9
Profile Context	Configured resolution
Validation Lock	locked · sha256:2d331a3af3b4942cdd878a68d4a9e5c7c9bcfc97f2ab6d1ec215e03dac963240
Canonical Pin Fingerprint	sha256:e3b0c44298fc1c149afb4c8996fb92427ae41e4649b934ca495991b7852b855
